VoiceThread is a flexible web application available from within Blackboard that allows you to upload, share, and discuss documents, presentations, images, audio files, and videos. VoiceThread is similar in function to other web discussion applications, but VoiceThread has extensive support for rich media, making it an engaging and useful online discussion application.

**CREATING A VOICETHREAD LINK**

1. From within a Blackboard content area (for example, the default content area named “Content”) click the **Tools** button and select **VoiceThread** from the drop-down list.

2. Enter the details of your VoiceThread session in the Blackboard text editor and click the **Submit** button when you are finished.

3. Your VoiceThread link is now active. You can follow the link to begin creating a new VoiceThread.

**NOTE:** You will be prompted to log into VoiceThread with your Missouri S&T username. When using VoiceThread for the first time, you must establish a new password for the application.
