Students can register clickers inside Blackboard, instead of registering their clickers through the Bookstore.

**NOTES:**

- You only need to register your clicker for one clicker-enabled course. Once your clicker is registered in one course, it will apply to all other clicker-enabled courses you are taking.

- Students can only register a single clicker at a time. Attempting to register another clicker will simply overwrite the previous Device ID. Students can have at most one clicker Device ID and one ResponseWare Device ID (accessible through a smartphone).

- It is also a good idea to update the firmware of the clicker device prior to Fall Semester in order to ensure that the response device is compatible with the most recent version of TurningPoint, which is always released just prior to Fall Semester each year. Visit the Walk-in Center on the Ground Floor of the Library to update the firmware. It only takes a few minutes.

**REGISTERING A CLICKER IN BLACKBOARD**

1. Login to Blackboard (blackboard.mst.edu).

2. Go to the course in which you wish to register a clicker.

3. Click **Tools**.

4. Click **Turning Technologies Registration Tool**.
5. Click **ResponseCard**.

**NOTE:** If you have also purchased a ResponseWare license and your instructor will permit the use of ResponseWare, you can alternatively click ResponseWare to register your ResponseWare Device ID (you will need your ResponseWare email address and password).

6. Under the Register a Device section, type in your **Device ID**, found on the back of your clicker.

For help please contact customer support toll-free within the US: 1.866.746.3015 or email support@turningtechnologies.com

Enter the 6 character hexadecimal Device ID located on the back of the ResponseCard. The only possibilities are 0-9, A-F. The letter 'O' is not a possible character because it is after 'F'.
7. Click **Register**.

**Register a Device**

Enter the 6 character hexadecimal Device ID located on the back of the ResponseCard. The only possibilities are 0-9, A-F. The letter 'O' is not a possible character because it is after 'F'.

8. You will see a message confirming that your clicker (Device ID) has been successfully registered. The My Registered Devices section of the page will show your new Device ID. You can click **Edit** to change the Device ID (it will overwrite any previous Device ID) or click **Delete** to remove the current Device ID.
