One of the most useful buttons that can be created in a Blackboard course menu is a button that takes students directly to the TurningPoint clicker registration tool. Students are required to register their clickers so they can use them in class.

**CREATE CLICKER REGISTRATION BUTTON IN COURSE MENU**

1. Login to Blackboard.
2. Navigate to a course.
3. Click on the **Create Item** button (it resembles an addition symbol) just above the course menu.
4. Click **Tool Link** from the drop-down list.
5. Type in a name for the button. For example, **Clicker Registration**.
6. Select **Registration Block** from the Type drop-down list.

7. Make sure **Available to Users** is checked.

8. Click **Submit**.
The new button will appear at the bottom of the course menu. Clicking it will take users to the TurningPoint registration tool.
