McNutt Hall B14 and 114 both have a somewhat simplified AMX control panel compared to some of the other classrooms on campus.

**POWER UP / POWER DOWN PROJECTOR(S)**

Press **POWER PROJ** to toggle the projector(s) on or off. McNutt 114 has two projectors. It takes approximately 1 minute for a projector to warm up, and 1 minute for a projector to cool down. 

**NOTE:** Until a projector has cooled completely, it cannot be turned on again.

**BLACK SCREEN BUTTON**

Press **BLACK SCREEN** in order to display a blacked-out screen.

**WARNING:** Do NOT leave a projector in the BLACKSCREEN state when leaving the room. If a projector left in the BLACKSCREEN state, this dramatically reduces the life of a projector. Always POWER OFF a projector!
SELECTING VIDEO DISPLAY FOR PROJECTOR(S)

To choose a video output for a projector, select one of the following options:

- **PC**: Selects the PC as the display output for a projector. **NOTE**: The document camera display overrides the PC display. You may need to turn off the document camera to show the PC display.

- **LAPTOP**: If you have connected a laptop to the instructor station, you will need to toggle your laptop to send its display to the projector in addition to pressing the laptop button. This will vary based on the make/model of your laptop.

- **DOCUMENT CAMERA**: Unlike other rooms equipped with AMX control panels and document cameras, McNutt B14 and 114 do NOT have a button on the control panel marked “DOC CAM”. However, it is still possible to show the document camera display as the document camera overrides the standard PC display when the document camera is turned on.
  - Press **PC**.
  - Press the power button on the document camera for approximately 1 second until the light around the power button turns blue.

![POWER BUTTON](image)

  - To switch back to the PC display, press the power button on the document camera for approximately 1 second until the button light turns yellow.

It takes a few seconds for the projector to register changes in video display.
