V.H. McNutt Hall 130 is equipped with an AMX touch-panel device that turns on the projectors and toggles between inputs.

The AMX Remote Control controls the video inputs to the projectors as well as the power for the projectors. It can be detached from its base, if necessary, and carried around the room, operating via a battery pack and wireless connection.

**TURN ON/OFF AMX REMOTE CONTROL**

1. Press the large square button on the right side of the AMX Remote Control.

2. The AMX Remote Control will turn itself off after a few minutes if it is not being used.

**POWER PROJECTORS**

1. Touch **System Power** on the AMX remote control.

2. To turn on a projector, select **LCD 1**, **LCD 2**, or **ALL** under the TURN ON column. The “ALL” option will turn on all projectors simultaneously. It takes approximately 40 seconds for a projector to power on.

3. To turn off a projector, select **LCD 1**, **LCD 2**, or **ALL** under the TURN OFF column. It takes approximately 1 minute to cool down a projector. The other functions of the AMX Remote Control are unavailable while the projectors cool down.

4. To return to the main screen, touch the **HOME** option.
SELECTING A DEVICE

1. Touch **Select Device** on the AMX remote control.

2. At the top of the screen will be several buttons listing the available devices. **NOTE:** It is possible to display multimedia feed from one device (e.g. the Document Cam) and still be able to use the instructor PC workstation, although the instructor station will not be able to be displayed on the screens while another device is active.

   - Touch **PC** to choose the input from the main CPU.
   - Touch **DVD** to select the DVD player as the input device.
   - Touch **VHS VCR** to select the VHS VCR player as the input device.
   - Touch **DOC CAM** to select the document camera as the input device.
   - Touch **LAPTOP** to select a laptop computer as the input device. Note that this only displays a laptop connected to the laptop video output connector on the instructor podium.

3. Selecting a device will also allow you to select which projector you want to use. Touch the **Power** option at the bottom of the AMX Remote Control display to choose a projector (LCD 1, 2, or ALL).

UNDOCK/DOCK THE AMX REMOTE CONTROL

1. Press the blue LED panel at the base of the AMX Remote Control to release it from its base.

2. Replacing it in its base can be tricky. When the AMX Remote Control is seated firmly in its base, it will display the message “Panel Docked” for a few seconds.
