Tegrity is a lecture capture application compatible with Blackboard. It allows instructors to record and archive their lectures in real-time, and then make them available for students to review later. Both students and instructors can add bookmarks to the archived recording (in real-time, if necessary) to make it easier to find points within the presentation that need additional clarification or explanation.

Tegrity apps are available for both iPhone and Android-based devices to allow students to review Tegrity recordings at their leisure.

**DOWNLOADING THE TEGRITY APPLICATION FOR iPAD**

1. Open the App Store on the iPad. In the Search box type *tegrity* and tap **Search**.

2. Select **Tegrity Mobile**.
3. Tap **Install**.

GENERATING A CONNECTION CODE

1. Login to Blackboard.

2. Navigate to the desired course.

3. Click Tegrity Classes. **NOTE:** Tegrity will open up a new window. Switch to that window.

   - Home Page
   - Content
   - Assignments
   - Discussions
   - Groups
   - Tools
   - Tegrity Classes

4. In the upper right hand corner click my account.

5. Click Generate Code. **NOTE:** Tegrity will generate a random six digit code. Once you have completed this step, keep the code easily available to access the Tegrity application on the iPad.
**USING THE Tegrity App**

1. Open the **Tegrity** App.

2. Type the six digit code from the previous section above and click **Connect**.

Follow these instructions to connect to Tegrity with your iPhone or iPad:

1. Using your computer, access Tegrity as you normally do.
2. Click **Settings** and then click **Generate Code**.
3. A connection code will be displayed. Enter the connection code above to continue.
3. Click **View Recordings**.

4. Scroll through the classes at the top of the screen and select the desired class.

5. Select the recording you would like to view.
