Clickers are devices that allow the user to submit answers to questions posed by the instructor. The clickers correspond with a receiver to collect the user's responses. Each receiver is set to a specific channel. If the user is utilizing the clicker for more than one course he or she might need to change the channel to match the respective receiver.

If the clicker is not set to the same channel as the receiver the answers will not be collected or recorded. To ensure this does not happen follow the instructions below for information on how to successfully change the channel on your clicker.

1. Press the channel button.
2. Type in the number of the correct channel. As you type in the number it will appear in the box on the screen.
3. Press the silver button in the center of the arrow keys.
4. A message will appear on your screen showing that the channel has been changed successfully.
