In order to use ResponseWare for a session, you will need to first create a Student Account. This is separate from your standard Missouri S&T account. If you already have a license to use a physical response device (in other words, an actual “clicker”), then you must purchase a SEPARATE license in order to use ResponseWare. ResponseWare licenses are available from the S&T Bookstore for a nominal fee.

ResponseWare allows you to respond to clicker questions using your smart phone, tablet (e.g. iPad), or laptop, either through an app or by visiting http://www.rwpoll.com

**IMPORTANT:** Not all instructors will allow you to use ResponseWare! So even if you have a ResponseWare license, you may still need to purchase a physical clicker device for some of your classes. Check with your instructor about which licenses are permissible for your classes.

**CREATE STUDENT ACCOUNT**

1. Open a web browser and go to https://account.turningtechnologies.com/account/
2. Click the Participant button in the lower-right corner of the page to make sure it turns a darker gray.
3. Type in your First Name, your Last Name, and your S&T Email address.
4. Click **Create Account**.

5. Confirm your email address. Type in a **Password** and confirm your **Password**. *(Optional)* User ID is a unique userid for ResponseWare. If you don’t type one in, your email address will be your default User ID. **IMPORTANT:** As always, IT recommends using a strong password that is at least 8-12 characters long and contains an assortment of upper-/lower-case letters, numbers, and common symbols (e.g. “-” and “_” are usually OK). This password is DIFFERENT from your S&T password!

6. Click **Save**.
