It is possible to import a participant list into TurningPoint directly from a Blackboard course. This makes it much easier for instructors to obtain the most recent participant lists for their course based upon the most up-to-date enrollment in their course, according to Blackboard (and the Registrar). Once a participant list has been downloaded, it is available for use in any of the TurningPoint applications (PowerPoint Polling, Anywhere Polling, or Self-Paced Polling).

Updating a participant list can sometimes resolve issues with session data inside of a TurningPoint session.

**UPDATING A PARTICIPANT LIST**

1. Open up Turning Point 5 to the dashboard. Click on the Manage tab at the top of the dashboard.

2. Click on a Participant List name to highlight the Participant List you want to update.

3. Click Results Manager in the bottom right corner.
4. Click **Integrations**.

5. Select **Blackboard** from the drop-down menu for Integration.

6. Type in `blackboard.mst.edu` in the Server Address.

7. Type in your S&T username and password.

8. Then click **Connect**.
9. Once the connect button is clicked, there is a window pop-up that shows Update with Integration, click **Update List**. You will receive a message **Participant List update complete**.

10. Click **Close** and you now have updated your participant list with the most current students there are in your course. If you want to see the dropped students, click the box next to **ShowRemoved Participants**.
